## **ATK04**

### **LOCKING DEVICE FOR ROLLING DOORS AND SIMILARS**

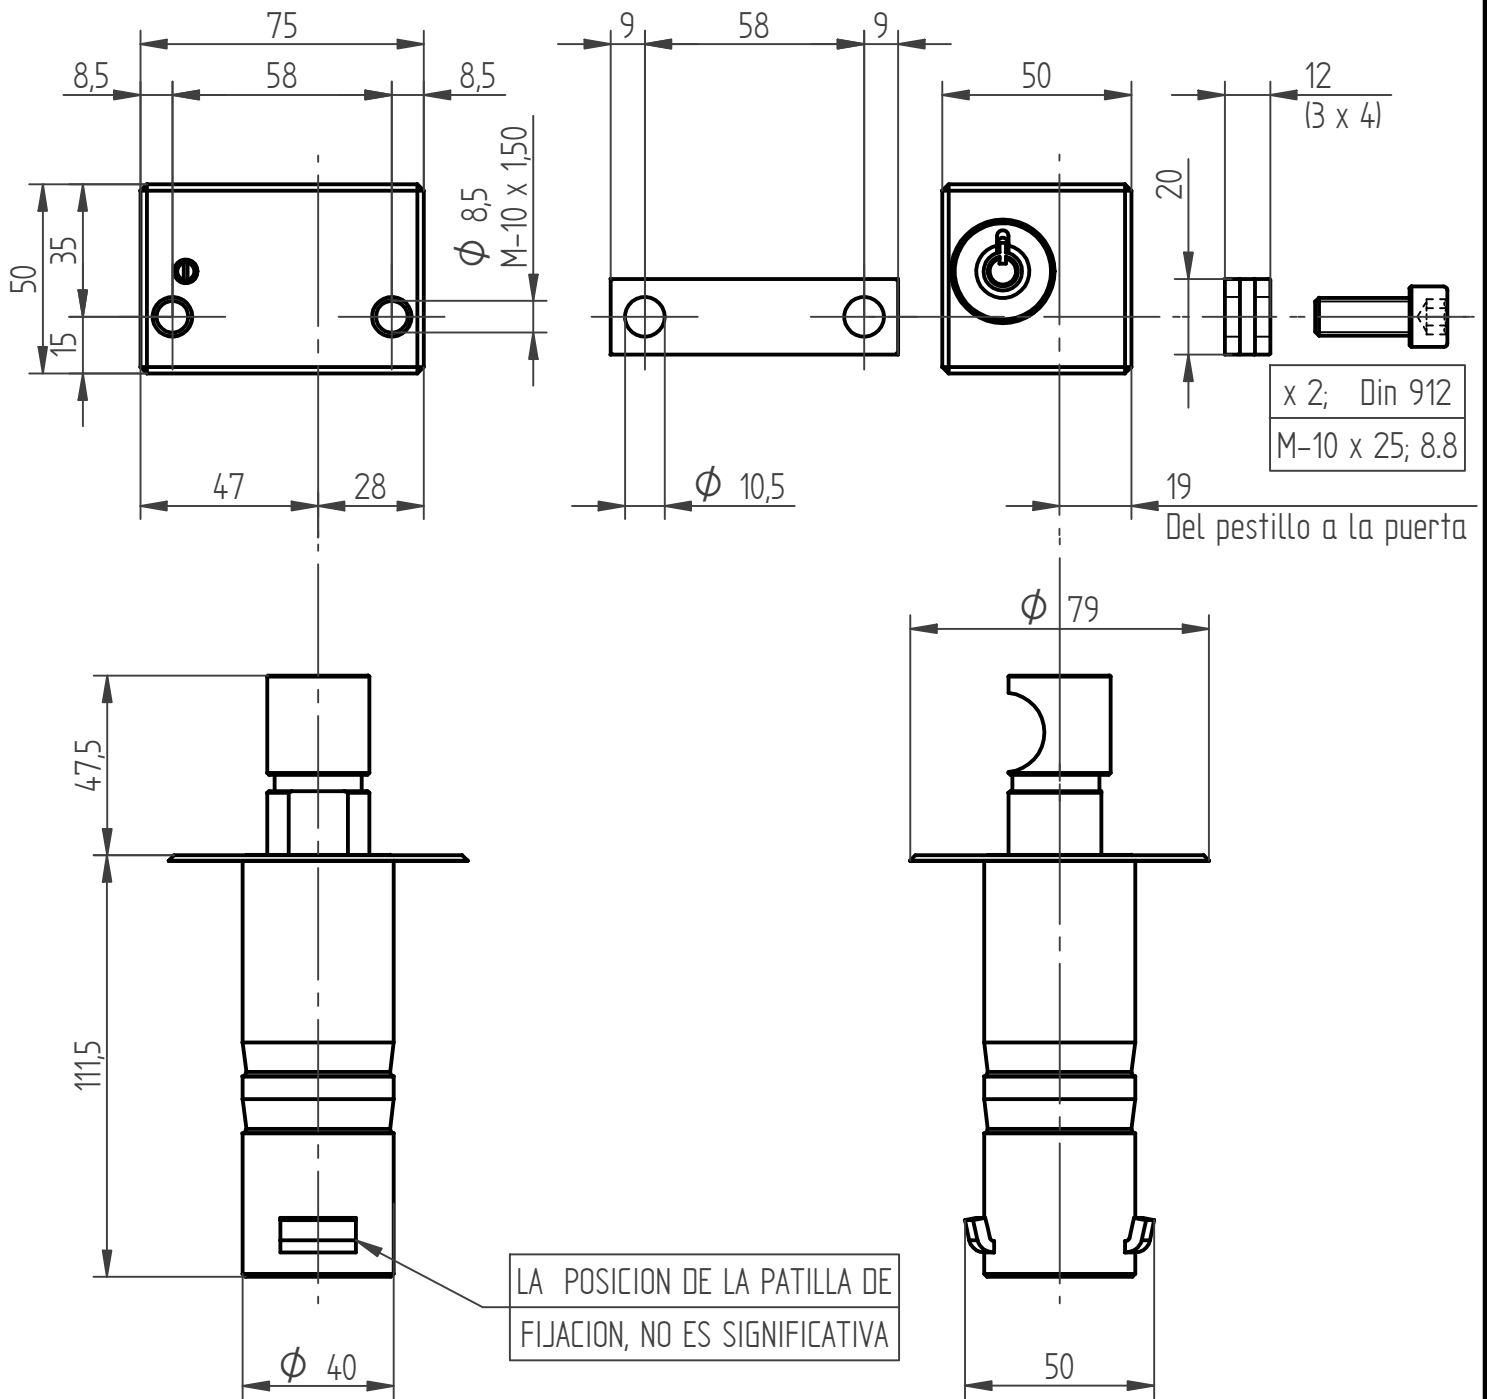

Compact and solid designed locking device, formed by a head top, where a simple lever are placed and function by a high-security cylinder with anti-drilling protection. At the closing position the lever block up the latch coming out from the tube built in the floor, and it makes altogether a very strong ensemble. This device is characterized by its simplicity, reliability, resistance and low cost.

The body of the head hat been made of solid chromium plated brass, the emergent latch of stainless steel and the closing lever of hardened steel with zinc and chromium plated. All the other elements have been made of either stainless steel or with anti-corrosive treatments.

#### **Versions**

**APK04**; Also available with flat-key of points-cylinder

**See the data sheets, with installation dimensions.**
